

Aqua Glaze - Roof Cleaning Risk Assessment

General Information

Company Name: Aqua Glaze Exterior Cleaning

Assessment Date: 16 / 03 / 2025

Reviewed By: Liam Walker

Location: Various residential and commercial properties in Telford and surrounding areas

Hazard	Potential Risks	Control Measures
Working at Height	Falls from scaffold or roof, injuries, fatalities	Use secured scaffolding and harnesses. Ensure proper setup before starting.
Structural Weakness	Roof collapse or damage	
		Inspect roof structure before working. Avoid weak or damaged areas.
Slippery Surfaces	Risk of falling on wet or mossy surfaces	Use non-slip footwear. Remove moss carefully before walking on surfaces.
Falling Debris	Injury to workers, pedestrians, or property	
		Use warning signs below work area. Secure loose debris properly.
Chemical Exposure	Skin and respiratory irritation from cleaning agents	Wear gloves and masks. Apply chemicals safely following COSHH guidelines.

Review & Updates

- This risk assessment should be reviewed annually or after any incident occurs.
- Any new hazards or risks will be updated with additional control measures.
- Staff must be trained on updated safety procedures and risk control policies.
